03 Numbers

The new 03 local rate number range has been created by OFCOM (the UK Telecommunications regulator,) to improve trust and confidence in UK phone numbers between its consumers.

There are many advantages to 03 numbers, for example, the 03 number can give a company national presence, and can also give a small business the image of being much larger than it is. Furthermore, if you are a small business, operating from home, a 03 local rate number can give you the protection you need for your home number.

03 local rate numbers will have the ability to be diverted to any UK landline or mobile, and the destination number of your 03 number can be changed whenever you want by just sending us an email. It couldn't be easier! Having a 03 local rate number means you have a number for life, if you relocate premises, all you have to do is just inform us your new destination number, and we will re-divert your number for free of charge, saving you money on advertising costs.

All Global Telecom 03 local rate numbers, give you the option of viewing your Call Stats on line, enabling you to monitor the ongoing success of your business marketing activities, and also to identify trends in the market. As with all NGNs provided by Global Telecom, you have the freedom to choose your number, giving you the ability to invest in a memorable number of your choice, that will also be easy for your customers to remember.

Revenue Sharing will be prohibited on 03 numbers. At present many consumers are dissatisfied with the fact that some organisations who use 0845, 0870 and 0871 numbers can claim a share of what the consumer pays to make a call. The benefit of 03 numbers is that they will be viewed as being more ethical and customer friendly.

No Setup fee

Decide the call charges your customers will pay for the call

The destination number for your 03 number can be changed by just sending an email

Give your company a national presence
